How would you print a \n on console ?
==========

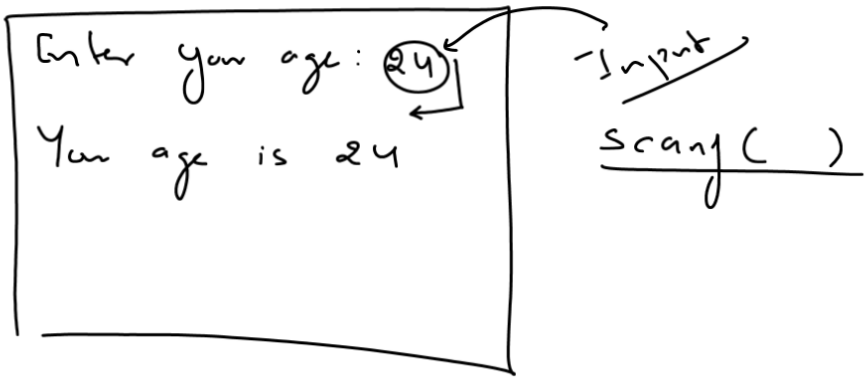
Solution:
=======
printf("\\n");

O/p
====
\n

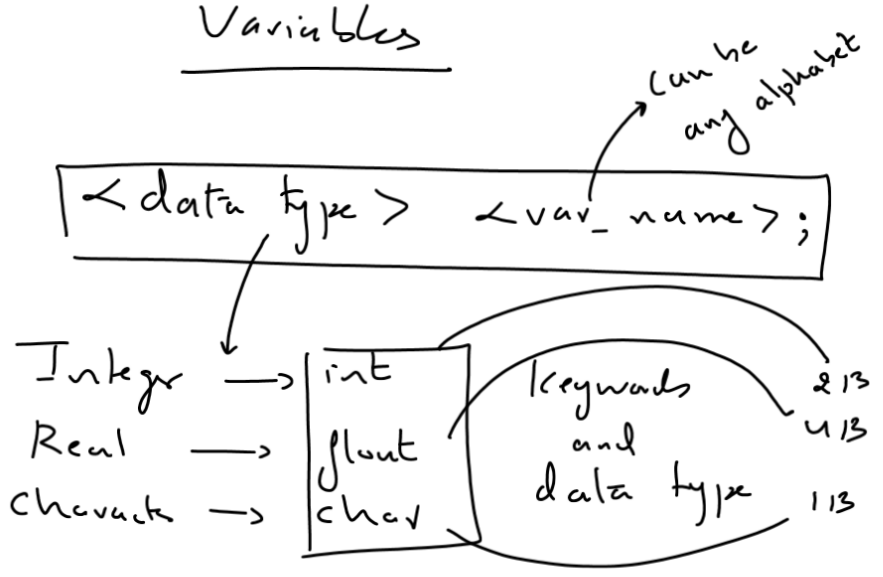
How would you print following output on console ?
==========
\n: is newline
\t: is tab

Solution:
=======
printf("\\n: is newline \n\t\\t: is tab");

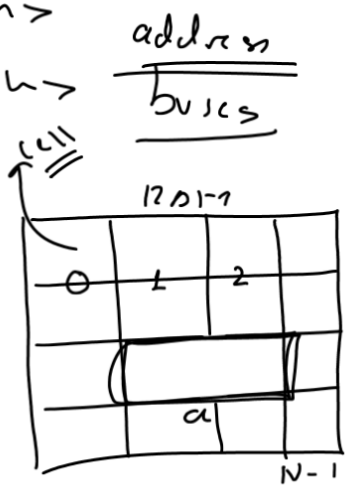
Designing User Interactive Programs



Variables



```
#include <stdio.h>
#include <conio.h>
void main()
{
    int a;
```



Pointer

8bit = 1B = 1 cell

1024B = 1KB

1024KB = 1MB

1024MB = 1GB
