

Java Practical Session

Topic: String Handling

- By Syed Faizan Ali

Today's Thought

Don't Confuse **Excellence** with **Perfection**.
Excellence we can reach for
Perfection is God's Business

Problem: Valid Anagram

Check if given strings is Anagram or not.

An Anagram is a word formed by **rearranging the letters** of different word

Examples 1:

String s = "anagram"

String t = "nagагам"

Example 2

String s = "rat"

String t = "car"

Problem: Longest Common Prefix

Find the longest common prefix string amongst an array of strings.
If there is no common prefix, return an empty string "".

Example 1:

```
strs = ["flower","flow","flight"]
```

Output: "fl"

Example 2:

```
strs = ["dog","racecar","car"]
```

Output: ""

Assignment: Restrictive Candy Crash

Choose a group of two identical character and remove them.
The Operation can be performed any number of times until it's no longer possible

Example 1:

Input: str = "good"

Output: "gd"

Example 2:

Input: str = "okgoogle"

Output: "okle"
